

Art Selection

Just Got Easier

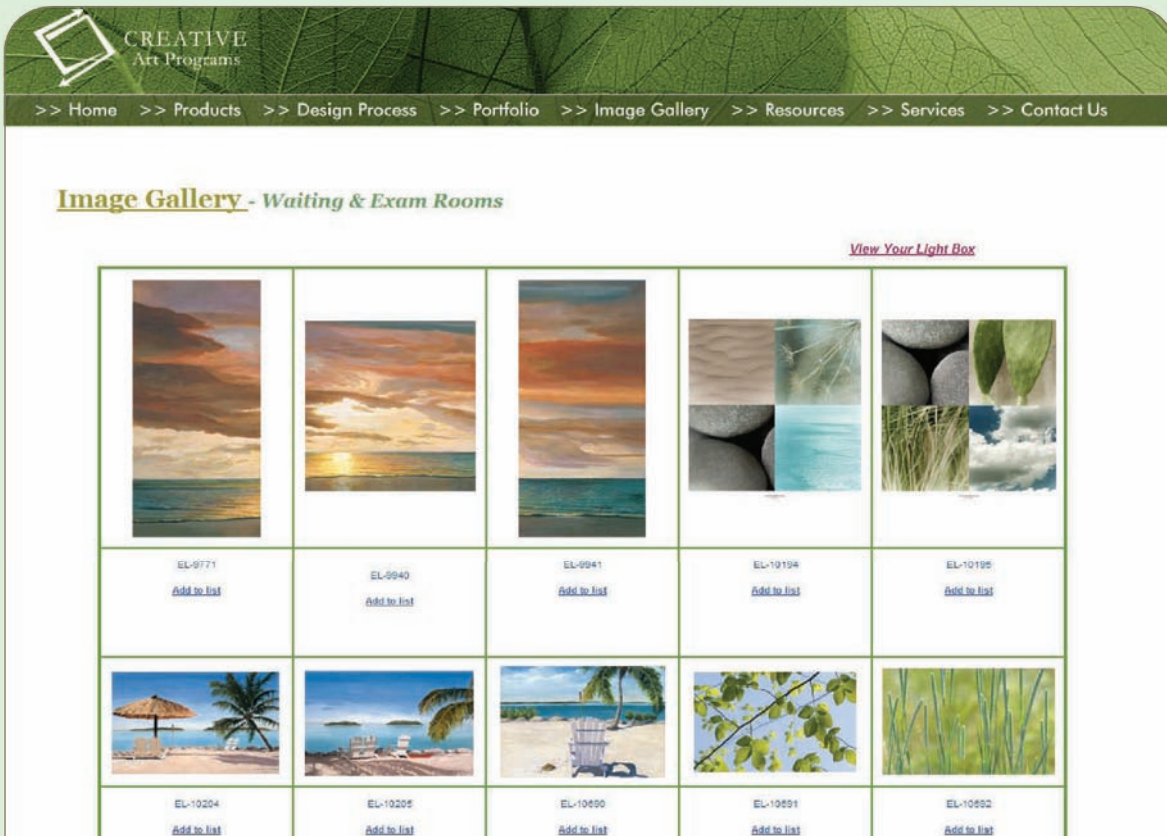

Inspired and guided by your suggestions, Creative has developed an online gallery of images specifically for the healing environment. We have handpicked the latest art prints and photography, categorized them by themes related to healthcare design and placed them online for you to choose your favorites.

Select a few sample images to send to our designers with floor plans, quantity desired or a general budget and we will source a complete art selection at no charge.

— Or —

Choose all of the images for your project and we will provide a GSA Schedule, 8(a), Service Disabled Veteran Owned Small Business (SDVOSB) proposal for your selections.

Making Life

CREATIVE

Small Ways To Make A Big Impact

Unique items incorporate nature into healthcare facility design

Recent healthcare design research charges us with a simple task; create a patient centered healing space reminiscent of the natural environment. Achieving the feeling of being outdoors in clinics, exam rooms and long corridors can be daunting. Doing so without a big budget construction project is beyond challenging. Designers are turning to nature inspired wall coverings, textiles and artwork to change their static halls and walls into a walk in the park.

To discuss the use of artwork to enhance your wayfinding system call 1-800-220-7446 or email us at creative@creativeartprograms.com

B. Creative can create custom shadowboxes using your choice of floral stems & botanical elements. Shown: artificial succulents and preserved moss encased in simple black boxes.

C. Any of our exclusive photography selections or custom healthcare compositions can be printed on interior commercial grade wall covering to fit your space.
